Book A Sloth — Investor Update

Period: 1–25 Aug 2026 (25 days) · **Source:** live production DB (read-only) · All figures ₹ (INR)

> **Stage note:** we switched on real-money payouts (Razorpay Route + host KYC) this window. So numbers split in two: **subscriptions are real cash**; **per-booking transactions are still pilot/test-value** (₹1–₹10 test bookings to validate the payment rail). We report both honestly rather than blend them.

1 · Money — what we actually collected

	Aug 1–25	All-time
Subscription revenue (real cash)	**₹2,039**	**₹3,808**
Active paying subscribers	—	**4**
Paid subscription charges	2	3
GST invoices issued	16	21
Paid bookings *(pilot/test-value)*	17	43
Booking GMV *(≈₹6/bkg — test)*	₹100	—
Platform fee earned on bookings	₹68	—

Defensible revenue for the period is ₹2,039 in subscriptions. The ₹100 booking GMV is test/token payments, not customer revenue — real per-booking revenue starts once payout-approved hosts turn on paid checkout at real prices. The rail (Route, KYC, ledger, GST) is built and live; demand is what's next.

2 · Growth & funnel — strong top, thin bottom

Stage	Aug 1–25	To date
Leads generated *(125 from launch event)*	146	208
New host accounts	20	75
Hosts onboarded	—	59
Hosts with a **live, bookable service**	—	34
Hosts **KYC-approved (payout-ready)**	—	7
Paying subscribers (active)	—	**4**
Hosts who took a paid booking	3	5 (ever)

We get people *in* well (208 leads, 75 hosts, 34 live listings) and don't yet get them to *pay and transact* (4 paying, 3 active). Closing that host-activation gap is the single most important number for next quarter — and most product work below targets it.

3 · Engagement & retention

Metric	Value
Unique paying guests	20
Repeat guests	7 (**35% repeat**)
Reviews · avg rating	5 · **5.0 / 5**
Support-bot conversations (all-time)	329

Early but positive: a 35% repeat rate and clean reviews say the core experience works once a host is live. The constraint is supply activation, not guest satisfaction. *(Sample sizes <25 — read as direction, not proven trend.)*

4 · Product — 170 changes shipped in 25 days

- **Sales CRM, end-to-end** — auto-created leads, scoring + intent, Kanban pipeline, WhatsApp/email sequences. The machine to close the activation gap.
- **Payments & payout rail live** — Razorpay Route, deferred KYC, gap-free GST invoicing, ledger hardening.
- **Onboarding redesign** — 4 screens rebuilt, first service created on the "You're live" screen, host-loss bugs fixed.
- **Activation & positioning** — funnel analytics, earnings-triggered upgrade nudges, weekly host recap email; site-wide "a booking link that gets you paid."

Transparency — what we disclose (and why)

1. **Real revenue vs test volume kept separate** — headline ₹2,039 subs; booking GMV labeled pilot. Blending overstates revenue ~20×.
2. **Activation gap shown openly** (146 leads → 20 signups → 4 paying) — a solvable funnel the CRM was built to fix beats a hidden drop-off.
3. **Stage stated plainly** — infrastructure-complete, pre-transaction-scale; this quarter's value is the rail that de-risks next quarter's revenue ramp.
